

# AWS Lambda Invocation

## Synchronous Invocation

Invoke Lambda synchronously:

## Asynchronous Invocation

Invoke Lambda asynchronously:

# AWS CLI Invocation Comparison

How to  
Invoke

## AWS CLI

### Synchronous Invocation

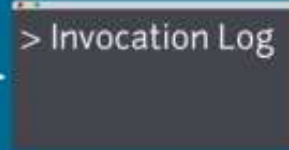

```
$ aws lambda invoke --function-name my-function --payload { "key": "value" } response.json
{
  "ExecutedVersion": "$LATEST",
  "StatusCode": 200
}
```

(String)  
event - JSON

response file  
from the  
function

base64 utility  
decode

--log-type option

object   
error - JSON  
function version  
status code  
 = 200  
 = Null  
No Error

### Asynchronous Invocation

```
$ aws lambda invoke --function-name my-function --invocation-type Event --payload { "key": "value" } response.json
{
  "StatusCode": 202
}
```
